★ 6/10

Ever since James Wan handed off the conjuring universe to the much less effective Michael Chaves, these conjuring films have been just ok.. >

The conjuring and the conjuring 2 remain some of the best horror films within the last 15 years for my taste. Some would even say the conjuring is one of the top horror films of all time. WAN found his niche within his created conjuring universe with the likes of these films, insidious, and all of the other spin offs. With this has come quite a few more filler movies from other directors that are much less experienced aside from (Whannell) at the helm. Michael Chaves is not a bad director by any means, but this simply does not hold a candle to the first two films or even the last one which was actually decently solid. This one just feels like the most uninteresting of the four and while it has a few decent demonic scares and visuals, it simply does not serve that much of a purpose other than a supposed

Fine-tuning su Bert usando il dataset di huggingface Lowerated/imdb-reviews-rated

Nel mio account huggingface è presente il modello realizzato.

The screenshot shows a Hugging Face repository page for the model 'Giusex04/cinedata-bert-film-aspects'. The repository is categorized under 'Safetensors', 'bert', and 'License: apache-2.0'. It has 0 likes and 0 contributors. The 'Files and versions' tab is selected, showing a list of files in the 'main' branch. The repository size is 439 MB. The files listed are:

File	Size	Download	Commit	Time
.gitattributes	1.52 kB	Download	initial commit	about 23 hours ago
README.md	31 Bytes	Download	initial commit	about 23 hours ago
config.json	970 Bytes	Download	Upload 7 files	about 22 hours ago
meta.json	557 Bytes	Download	Upload 7 files	about 22 hours ago
model.safetensors	438 MB	Download	Upload 7 files	about 22 hours ago
special_tokens_map.json	125 Bytes	Download	Upload 7 files	about 22 hours ago
tokenizer.json	711 kB	Download	Upload 7 files	about 22 hours ago
tokenizer_config.json	1.22 kB	Download	Upload 7 files	about 22 hours ago
vocab.txt	232 kB	Download	Upload 7 files	about 22 hours ago

Spark per BERT

Data la limitazione di RAM del mio mac procederemo ad utilizzare spark (e anche altri servizi) con delle limitazioni di memoria.

Per l'utilizzo di BERT è necessario un approccio micro-batch, con 10 review alla volta, aggiungiamo un trigger di 10 secondi per evitare overhead

Sono limitato dalla tecnologia del mio tempo

-Howard Stark

Spark per kafka

SparkSession

```
spark = SparkSession.builder \
    .appName("ReviewAspectAnalysis") \
    .master("local[1]") \
    .getOrCreate()
```

DataFrame

```
df = spark.readStream.format("kafka")
    \.option("kafka.bootstrap.servers",
    "kafka:9092") \
    .option("subscribe", "reviewFilm") \
    .option("startingOffsets", "earliest") \
    .option("failOnDataLoss", "false") \
    .option("maxOffsetsPerTrigger", "10") \
    .load()
```

Schema kafka

```
kafka_schema = StructType([ StructField("review_id", StringType(),
True), ... ])
```

WriteStream

```
query = reviews_df.writeStream \
    .foreachBatch(process_batch) \
    .trigger(processingTime='10 seconds') \
    .option("checkpointLocation", "/tmp/spark-checkpoints/reviewFilm") \
    .start()
```
